

ECOSOFT ERIC DC* FLUSHABLE WATER FILTER

The ERIC DC is a high-performance sediment filter designed to tackle problem water effectively. It removes dirt, sand, and rust, ensuring cleaner and safer water for your home.

Fully automatic flushable are making it long-lasting and cost-effective. It is also iron resistant, preventing clogging and maintaining optimal performance over time intervention

WATER SOURCE: Tap water supply. For water with a high iron content

KEY FEATURES

- Ultra-fine filtration – 40-micron disc filters for long-lasting durability and efficient water purification
- Hassle-free auto cleaning – Set the flush cycle by days and time, and let the filter do the work
- Reverse backwash filtration – Loosens the discs for thorough and efficient cleaning
- Flexible installation – Smart connection module lets you install it however you need
- Built-in pressure reducer – Protects your downstream equipment from pressure spikes
- Easy pressure monitoring – Outlet gauge helps you keep track of system pressure at a glance

ADDITIONAL FEATURES

- Battery-Powered Control Module – No need for wiring, easy to install anywhere
- 360° connection module – allows to install filter on both horizontal and vertical pipelines
- Wide Operating Temperature – Works in environments from 5° C to 40°C
- Operating pressure – Works efficiently with a pressure range from 1.5 bar to 10 bar

TECHNICAL SPECIFICATION

	ERIC DC
Flow rate, m ³ /hour	4
Connection	1" G thread male w 3/4 male inch extra connector
Drain line connection	3/8 collet
Working temperature, °C	+5...+40
Operating pressure, bar	1.5 - 10
Cartridge	Polymer disks cartridge, 40 µm
Electrical requirements	100-240 V, 50-60 Hz
System electrical power, W	5
Dimensions (L×W×H), mm	310 x 185 x 150

* DC - disk-type filter with controller
