

Hygienic guard

DESCRIPTION

The device used for chlorine disinfection of reagent systems from RF1018 to RF1665, Titanium Gold series, Arctic Blue series and prevention of microbiological contamination. It is also used for the water supply from the Rozhnovsky tower and other open tanks with microbiology present.

KEY FEATURES

- Set for Ecomix and resin disinfection, installed with Clack CE, CI and DV control valves
- Compact design
- It is installed in the valve at the place of the microswitch
- No need to buy additional materials for connection
- Used for RF1018 - RF1665, Titanium Gold series, Arctic Blue series

COMPONENTS

- Electrical board
- Chlorine cell
- O-ring
- Connection wire
- Bolts
- Instruction manual
- Plastic box

PHYSICAL PARAMETERS

| | |
|---------------------------------|----------------|
| Inlet, outlet | 3/8" |
| Operating pressure | 2 - 6 bar |
| Operating temperature | +4...+30 °C |
| Electrical requirements, in/out | 7,5 VA / 10 VA |
| System weight | 0,2 kg |
