

## FAUCETS WITH AN ELECTRIC KEYBOARD

### AQA drink 20 U: THE SMART SOLUTION FOR SAVING SPACE AND ADDING PERSONALITY TO YOUR KITCHEN

AQA drink 20 U (under-sink version) requires a dispensing tap.

BWT offers you a choice of two different models:

- 3-way: to add to your tap
- 5-way: for a single tap

### 3-WAY FAUCET WITH KEYBOARD

This dedicated faucet is added to the existing faucet on your kitchen sink and allows water to be dispensed from your BWT AQA drink 20 U. An extra solution for fresh, sparkling or room temperature water if you do not want to replace your current tap.

Pipe for passing water through your AQA drink 20

Pipe for the passage of untreated water

### 5-WAY FAUCET WITH KEYBOARD

This tap is the perfect solution if you prefer to have only one tap on your worktop. Its design is not only eye-catching and perfect for every kitchen, but also encompasses a number of technological innovations: the BWT faucet with keypad has on one side the classic single-lever lever for dispensing cold and hot tap water, and on the other side a keypad that allows you to dispense room temperature, cold or sparkling cold water.

Two separate tubes and an innovative spout ensure that tap water and water from your AQA drink 20 U do not mix.

General information	3-WAY	5-WAY
Product code	125592404	125592403
