

## 2P HOUSING FILTERS

The 2P housing is designed for water purification for residential and commercial applications. The bowl is made of PET material, which guarantees reliability and durability.

The 2P housing is equipped with a centralizing ring for cartridges. The ring keeps your cartridge centered and makes replacement procedure easy and fast.

### KEY FEATURES

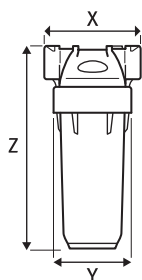

- "Stop thread" prevents overtightening of bowl and o-ring
- Internal centrator to ensure proper orientation of the cartridge
- Less pressure drop through "star-like" head design
- Compatible with three cartridge designs: DOE, BIG, COD3
- Smart placement of the wrench in the bracket avoids its loss

### DATA SHEET

<b>Head</b>	PP with brass connection units
<b>Clamping</b>	Threaded
<b>Bowl</b>	PET*
<b>O-ring</b>	EPDM
<b>Max working pressure</b>	8 bar
<b>Max working temperature</b>	From 5°C (41°F) to 50°C (122°F)
<b>Bracketing</b>	Horizontal
<b>Fastening</b>	Axle base fixing hole 40x32 mm hole for screws 3 mm
<b>Connection</b>	Screw thread in inch
<b>Package</b>	Empty housing without filter cartridge
